

TACTICAL CRICKIT®

REV011118

The compact all-in-one cricothyroidotomy kit that features all CoTCCC recommendations for a surgical airway kit in the tactical setting

Perform surgical cricothyroidotomy In the tactical environment

Supplying the operator with all the necessary tools to conduct a proper cricothyroidotomy in a low cube and ruggedized package, the Tactical Crickit® is the ideal kit for performing a cricothyroidotomy in austere environments.

For ease in both training and live fire situations, it's components are provided in the proper order of use. Once unrolled, the Tactical Crickit's 500-denier pouch provides a clean working surface for the operator, making it viable for use in low-light and battlefield environments.

The Tactical Crickit® also provides the user with a tracheal tube that is both the ideal size and length, along with a securing device to aid in secondary treatment and TACEVAC. To combat microbial contamination, this kit is supplied with alcohol pads for immediate disinfection, and povidone for long-term protection. The Tactical Crickit® was specifically engineered to meet CoTCCC requirements for a surgical airway kit.

Features:

- Provides all of the components necessary to conduct a surgical cricothyroidotomy correctly
- The ideal length and size tracheal tube with securing device included
- Components configured in the sequence of use and ideal for low-light, battlefield environments
